

Mahtab Farrokh

MACHINE LEARNING ENGINEER

✉ farrokh.mahtab@gmail.com | 🏠 mahtabfarrokh.github.io | 🌐 mahtabfarrokh | 📄 mahtab-farrokh | 🎓 Google Scholar | 📍 Vancouver, BC, CAN

Highlights of Qualifications

- **5+** years of experience collaborating with interdisciplinary teams to tackle practical challenges using machine learning.
- **6+** years of experience with Python, PyTorch, Keras, CUDA, GCP, and Scikit-Learn, including **2+** years in industry.
- Publications at top venues such as **ICML**, **IEEE ICASSP**, and leading medical informatics journals.
- **2** years of experience in software development and full-stack projects including React, Node.js, HTML/CSS, and SQL.

Relevant Experiences

Machine Learning Engineer

Edmonton, Canada

Alberta Machine Intelligence Institute (Amii), Clio

Jul 2024 - Now

- Led end-to-end development of an **LLM** pipeline leveraging GPT-4o and **Langchain** to automate legal document analysis, including timeline summarization, entity recognition, and date extraction with 83% accuracy.
- Developed **Docker-based** deployment pipeline with **FastAPI**, successfully transitioning to the production environment.
- Developed strong client communication and decision-making skills through leading weekly client meetings.
- **Tools:** Langchain, OpenAI, Docker, Transformers, FastAPI, Python, MLflow, AWS (Textract, Bedrock)

Machine Learning Intern

Edmonton, Canada

Alberta Machine Intelligence Institute (Amii), MDA Space

Mar 2024 - Jun 2024

- Developed and optimized a Retrieval-Augmented Generation (RAG) chatbot for answering engineering questions.
- Performed prompt engineering on the RAG chatbot, utilizing hybrid search methods and reranking models, to enhance information retrieval accuracy by 20%.
- **Tools:** Langchain, HuggingFace, Open-Source LLMs, Chroma Vector DB, Milvus, Python

Research Assistant

Edmonton, Canada

University of Alberta

Jan 2021 - Dec 2023

- Introduced a pipeline for prostate cancer (PCa) recurrence prediction using tissue images, **fine-tuning a contrastive self-supervised** model with a NN head. Improved PCa prediction by **7%**, published in Journal of Pathology Informatics.
- Proposed a novel and effective evaluation metric for individualized survival probability prediction published in ICML.
- **Tools:** Torchvision, PyTorch, SimCLR, Keras, Python, GCP, Scikit-Learn

Machine Learning Engineer [Part-time]

Tehran, Iran

Tebinja

Oct 2017 - May 2019

- Designed and implemented a web-based symptom checker using ensemble models, including DQN (Deep Q-network), Deep Neural Network, achieving 74% accuracy.
- **Tools:** Keras, Tensorflow, Scikit-Learn, Python, Node.js, React, CSS, PostgreSQL, Redis.

Education

Master of Science in Computer Science

Edmonton, Canada

University of Alberta, Supervisor: Russ Greiner

Jan 2021 - Dec 2023

Bachelor of Computer Software Engineering

Amirkabir University of Technology

Tehran, Iran

Sep 2015 - Jan 2020

Notable Key Projects

HuntMate: AI-Powered Job Search Assistant 🔄

- Engineered a sophisticated **multi-agent** job search assistant using **LangGraph** and **GPT-4**, enabling dynamic conversations between specialized agents for personalized job hunting, filtering, and application assistance. Feb 2025
- **Tools:** LangGraph, Streamlit, LiteLLM, Ollama, OpenAI, Python

Multilingual Alzheimer's Dementia Recognition through Spontaneous Speech

- Designed an ensemble-based model, securing 4th place in the ICASSP challenge with 70% test set accuracy.
- Developed interpretable, language-agnostic features inspired by clinical research on Alzheimer's dementia.
- Introduced a novel pause distribution analysis by fitting various probability density functions, enabling cross-lingual adaptability for Alzheimer's dementia prediction. Dec 2023

Language Comprehension Assistance for Individuals with Autism

- Led a project to translate and paraphrase figurative language (e.g., idioms, metaphors, and sarcasm).
- **Fine-tuned** a T5 (Text-To-Text Transfer Transformer) model on figurative data, achieving a BLEU score of 0.72. Jul 2023

Technical Skills

- **Programming/Scripting Languages:** Python, C++, SQL, \LaTeX , Bash
- **Frameworks/Libraries:** Langchain, Tensorflow, PyTorch, Keras, Numpy, Pandas, HuggingFace, Scikit-learn, Streamlit
- **Other Skills:** Docker, CUDA, Object-Oriented Programming, Git, GCP, AWS (Bedrock, SageMaker, Textract)

Community Involvement

Mentor

Montreal, Canada

Mila - AI4Good Lab

May 2024 - July 2024

- Designed lectures and served as a mentor for a training program for women and gender-diverse people across Canada.
- Led interactive discussions to ensure students' understanding of Neural Networks, Convolutional Neural Networks, Residual Neural Networks, Transformers, and more.

Great Cycle Challenge

Edmonton, Canada

Volunteer

Aug 2021 - Aug 2024

- Biked more than 600 Km, and raised more than \$1.3k to support kids with cancer.
- Link to my fund-raising page: [\[click here\]](#)

Students Scientific Chapter (SSC)

Tehran, Iran

Academic Director

Sep 2017 - Dec 2018

- Elected as a member of Students Scientific Chapter(SSC), CEIT Department, Amirkabir University of Technology.
- Organized over 70 events to build community, enhance technical knowledge, and provide industry exposure for students.

AUT ACM ICPC

Tehran, Iran

Member of Execution Committee

Nov 2016 - Nov 2018

- Organized the 18th, 17th, and 16th International AUT ACM ICPC.
